📊 Capstone Project Report: Executive Overview Dashboard

1. Introduction

The Executive Overview Dashboard is designed to provide senior management with a concise and comprehensive view of the organization's overall sales and profitability performance. The dashboard focuses on key business metrics and trends, enabling quick assessment of business health and supporting strategic decision-making.

---

2. Objective

The primary objective of this dashboard is to: - Monitor total sales, profit, and profit margins - Track sales and profit trends over time - Compare performance across regions and product categories - Enable leadership to identify high-level opportunities and risks

---

3. Key Metrics Displayed

- **Total Sales:** Overall revenue generated
- **Total Profit:** Net profit after discounts
- **Profit Margin:** Profitability relative to sales
- **Total Orders:** Number of transactions

These KPIs provide an instant snapshot of business performance.

---

4. Dashboard Components

- **KPI Cards:** Highlight core performance indicators at a glance
- **Sales & Profit Trend Line:** Shows monthly performance and growth patterns
- **Profit by Region Bar Chart:** Compares regional profitability
- **Sales by Product Category Donut Chart:** Displays category contribution to total sales

---

5. Insights Generated

- Identifies regions contributing the highest profit
- Highlights seasonal or monthly sales trends
- Reveals product categories driving the majority of revenue
- Enables early detection of declining profitability

6. Business Value

This dashboard allows executives to quickly evaluate overall performance without deep data exploration. It supports data-driven strategic decisions related to regional focus, product investment, and revenue optimization.

7. Conclusion

The Executive Overview Dashboard serves as a centralized performance monitoring tool, offering clear, actionable insights that help leadership maintain profitability and guide business strategy effectively.
